**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 103*

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Buckley (US 5,722,482). Buckley shows a thermal control device formed by attaching a layer 21 with integrated PCM material 20 with at least one additional layer of insulating material. The device can be formed as a blanket for use in thermal control of a febrile patient. As described in column 4 and shown in Figure 2, the device can be formed as a laminated structure with a layer B being formed from a PCM type material. An insulating layer A can be attached to one side of the layer B to form an exterior surface of the composite. A similar insulating layer C can be attached to the opposed side of layer B, and forms an interior side of the composite which can be placed against the skin of a user. Both layers A and C are specified as being formed from thermally insulating materials such as a plastic foam (column 4, line 59) with layer C being thinner than layer A. The examiner takes notice that while plastic foam is specified as being the preferred material, a large class of materials are available which qualify as insulating materials. Such materials include but are not limited to down, feathers, textiles such as cotton or polyester materials, wool, latex foams, and so forth. Because the equivalence of these insulating materials

is well known within the art it would have been obvious to the skilled artisan to have used any one of these equivalent materials such as down as one of the insulating layers A, C in the Buckley thermal control device.

*Response to Arguments*

Applicant's arguments with respect to claim 2 have been considered but are moot in view of the new ground(s) of rejection.

*Conclusion*

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michael Trettel whose telephone number is (571) 272-7052. The examiner can normally be reached on Monday, Tuesday, Thursday, or Friday from 7.30 am to 5.00 pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Heather Shackelford, can be reached on (571) 272-7052. The fax phone number for the organization where this application or proceeding is assigned is (703) 872-9306.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is 703-308-1113.
